Frontend Developer

I have 5 years of experience in ReactJS and Next.js development. I turn designs and wireframes into high-quality, efficient code that works smoothly on different devices and browsers. I am skilled in building reusable components that can be easily used across different projects. My core expertise lies in ReactJS and Next.js.

WORK EXPERIENCE

Simplicity Technologies 06/2024 – Present
Islamabad, PAK
Senior Frontend Developer (React.js / Next.js) • Full-time

- Collaborated with cross-functional teams to design and launch the **Dubbing Video Editor**, resulting in a seamless user experience and increased project visibility.
- Led the development of the **PTCL Audio Portal**, ensuring seamless integration of features that enhanced user engagement and operational efficiency.
- Developed reusable React components for the **Lab Patient Management System**, enhancing user experience and reducing load times.

Code Hub System (UK Based) 08/2023 – 07/2024
Islamabad, PAK
Senior Frontend Developer (React.js / Next.js) • Full-time

- Developed the **IReport** multi-tenant blog application, enabling users to create and manage blogs across all tenants, enhancing user engagement.
- Developed the **AI Chat** an AI-powered chat application integrated with IReport. The app can fetch information from blogs and generate responses in various formats such as PDF, DOC, and text files. It also features pop-up modals and fully functional blog pages.
- Developed **Sphere management system** product designed to streamline organizational processes and improve overall efficiency.

Code Minimalist Technologies (USA Based) 06/2022 – 11/2023
Islamabad, PAK
Senior Frontend Developer (React.js / Next.js) • Full-time

- Photo ID is a real estate web application that allows users to sign up and showcase their properties, with listings organized by categories for easy browsing of property images.
- **NCR Dashboard** is user a management dashboard featuring bulk user import, role-based access (admin and user), and interactive visualizations such as pie charts and line charts.
- **Workflow Builder** is a enterprise-level drag-and-drop workflow builder, similar to WordPress, allowing users to create and customize workflows using templates.
- **Training Portal** is a platform for managing and delivering training content to users efficiently.

Simplicity Technologies 06/2021 – 06/2022
Islamabad, PAK
Junior Frontend Developer (React.js) • Full-time

- Developed a dynamic table listing for the **Employee Management System**, enabling efficient browsing and sorting of employee records, which improved data accessibility.

Softoo Technologies
Backend Developer (Node.js, AWS) • Full-time

09/2020 – 02/2021
Islamabad, PAK

- Developed a **Slack Bot Attendance System** within 3 months, leveraging AWS Lambda and API Gateway to automate attendance tracking and improve efficiency.
