

ATIQ UR REHMAN

MERN Stack Developer | React.js | Next.js | Node.js | MongoDB | 6+ Years

+92 323 8528992 | atiqu555@gmail.com | linkedin.com/in/atiq-ur-rehman-692559176 | Islamabad, Pakistan

PROFESSIONAL SUMMARY

MERN Stack Developer with 6+ years of hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in Next.js, TypeScript, REST API development, JWT authentication, Redux Toolkit, Tailwind CSS, Prisma ORM, Supabase, and AWS Lambda. Delivered 10+ live production projects for clients in Pakistan, UK, and USA. Strong background in Agile/Scrum, Git workflows, code reviews, and cross-functional team collaboration. Consistently delivers scalable, maintainable, and performance-optimized software on time.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frontend: React.js, Next.js, Redux, Redux Toolkit, React Hooks, Context API, JavaScript (ES6+), TypeScript, HTML5, CSS3, jQuery, PWA

Backend: Node.js, Express.js, REST API Design, MVC Architecture, JWT Authentication, Middleware, Mongoose

Database: MongoDB, Mongoose ODM, Supabase (PostgreSQL), Prisma ORM

Auth & Security: NextAuth.js, Clerk, JWT, Role-Based Access Control (RBAC), OAuth

Styling: Tailwind CSS, CSS Modules, Bootstrap, Responsive Web Design, Mobile-First Design

API & Testing: RESTful APIs, Postman, Axios, Fetch API

Cloud & DevOps: AWS Lambda, Vercel, Docker, CI/CD Pipelines, Environment Variables

Dev Tools: Git, GitHub, Webpack, Babel, ESLint, Jira, npm, yarn

Methodologies: Agile, Scrum, Code Review, Sprint Planning, On-time Delivery

AI Tools: Claude (Anthropic), Cursor AI, Google Gemini

KEY ACHIEVEMENTS

- Reduced application load time by 30% using React lazy loading, code splitting, and optimized component architecture.
- Automated attendance tracking for 100+ employees with a Node.js + AWS Lambda Slack Bot, eliminating manual data entry.
- Accelerated team feature delivery by 25% by building a shared Tailwind CSS + React component library.
- Built and deployed multi-tenant SaaS platforms on Vercel capable of handling thousands of concurrent users with zero downtime.
- Integrated MongoDB with Mongoose ODM across multiple production applications ensuring efficient data modeling and query performance.
- Consistently delivered all projects on schedule across Pakistan, UK, and USA client engagements over 6 years.

PROFESSIONAL EXPERIENCE

MERN Stack Developer / Senior Software Engineer

Jun 2024 – Present

Veyn AI | Islamabad, Pakistan

- Built a browser-based Video Dubbing Editor using React.js, Next.js, and Node.js REST APIs enabling live dubbing without any desktop software (ElevenLabs-style).
- Developed the PTCL Audio Portal (Pakistan's largest telecom) with Next.js, Express.js, and REST API integration, streamlining daily operations for the entire team.
- Created a reusable React.js + Tailwind CSS component library for a Hospital Patient Management System improved load speed by 30% and accelerated new feature rollout.
- Managed MongoDB schemas and Mongoose models for multiple backend services, ensuring data consistency and performance.
- Worked in Agile/Scrum sprints with designers, backend developers, and QA engineers for consistent on-time delivery.

MERN Stack Developer

Aug 2023 – Jul 2024

Code Hub System (UK-Based) | Islamabad, Pakistan

- Built **IReport** a multi-tenant blog SaaS platform with Next.js, Node.js, and MongoDB capable of serving thousands of simultaneous users with no performance degradation.
- Developed Sphere System in React.js and Express.js a unified team and task management solution for enterprise clients.
- Implemented JWT-based authentication and RBAC for secure multi-user access control across client platforms.
- Applied lazy loading, code splitting, and Axios-based API optimization to significantly improve page performance.

MERN Stack Developer

Jun 2022 – Nov 2023

Alphasquad (USA-Based) | Islamabad, Pakistan

- Built Photo ID a property listing platform in React.js with MongoDB-backed listings, image galleries, and category-based browsing for sellers and buyers.
- Developed NCR Dashboard, an admin panel with charts, bulk user upload via CSV, and RBAC using React.js, Node.js, and MongoDB.
- Built NCR Workflow Builder, a drag-and-drop no-code workflow tool using React.js, allowing users to define business processes without writing code.
- Created NCR Training Portal an LMS-style platform in React.js and Node.js for assigning, delivering, and tracking online corporate training.
- Designed and consumed RESTful APIs using Postman, Axios, and Express.js across all four product lines.

Junior Frontend Developer

Jun 2021 – Jun 2022

Simplicity Technologies | Islamabad, Pakistan

- Built the Employee Management System in React.js with full CRUD, search, and sorting — allowing HR to manage all records in a single interface.
- Created a shared Tailwind CSS + React component library that cut new page development time by 25%.

Backend Developer (Node.js)

Sep 2020 – Feb 2021

Softoo Technologies | Islamabad, Pakistan

- Built a Slack Attendance Bot using Node.js, Express.js, and AWS Lambda that auto-tracks attendance for 100+ employees.
- Deployed solution on AWS with high-availability setup ensuring consistent uptime under concurrent user load.

KEY PROJECTS

- **Video Dubbing Editor** Real-time browser dubbing tool (React.js, Next.js, Node.js, REST API). No desktop software needed.
- **IReport + AI Chat** Multi-tenant blog SaaS with AI chat, PDF/Word export (Next.js, Node.js, MongoDB).
- **NCR Workflow Builder** Drag-and-drop no-code workflow builder (React.js, Node.js, MongoDB, Express.js).

- **PTCL Audio Portal:** Enterprise audio management system for Pakistan's largest telecom (Next.js, REST API, Node.js).
- **Slack Attendance Bot:** Auto attendance tracking for 100+ staff (Node.js, Express.js, AWS Lambda, MongoDB).

EDUCATION

Bachelor of Science in Computer Science (BS CS)

COMSATS University Islamabad, Attock Campus | Graduated: 2020
